

Dear FCC Commissioner and Public Servant;

I have been looking forward to this valuable service becoming available in my area, and have come to see it as one of the options I am paying for as an XM Radio subscriber. Please do not curtail this benefit that could save drivers time, increase convenience and fuel efficiency, and possibly promote safety and improved air quality as well. This is truly a quality of life issue, in addition to affecting freedom of speech.

We request that you reject the NAB's petition 04-160 for the greater public good.

Respectfully,

Peg and Ron Marson
